

**Develop. Design. Manufacture.**  
**Printed electronics**  
**into mass production**

**Your partner for manufacturing  
printed electronics under  
cleanroom conditions!**

## We evolve your concepts to printed products

**Witte Technology GmbH** has been involved in the printing industry for 100 years and has a long history of success. We have experience in sheet-to-sheet and roll-to-roll printing products for various sectors worldwide, ranging from industry to automotive and healthcare. Customers are able to develop their products from scratch to industrial series production thanks to our expertise and experience. Our new fully automatic sheet-to-sheet screen-printing machine is a cutting-edge solution for producing medical and industrial sensors faster and more efficiently under clean room conditions.

We possess the capability to create conductive ink lines that are as thin as 100 µm or lower. We have the ability to provide customized products to meet your needs. Our past experiences have included using various stake-up layers and overprinting with excellent accuracy.

Our infrastructures are fitted with 100% optical and electrical control systems for printed products, and we have the capability to carry out precise laser cutting and punching operations. Our services extend to converting the product through various glue and stiffener applications. Additionally, we have partners who offer complete solutions for electronics and data readout for printed products.

## Why creating your printed electronics product with the Witte Technology Team?

- Functional and non-functional printing
- Cleanroom conditions
- Customised solutions
- Product development
- Contract manufacturing
- Scale up solutions
- Advanced converting options
- Mass production
- Roll2Roll, Roll2Sheet and Sheet2Sheet in large format
- Partners for electronics and data readout

Member of the Verband  
der Automobilindustrie

Organic and Printed  
Electronics Association

Quality management in accordance  
with ISO 9001 and ISO/TS 16949

Environmental management in  
accordance with ISO 14001
