

Witte Group: Your award-winning partner for innovative system solutions in industrial and security printing

Innovation, quality, customer satisfaction and true partnerships

[Wermelskirchen, March 14, 2025] - The Witte Group has been recognized as one of the **TOP 100 Innovators 2025**. This honor is awarded to particularly innovative medium-sized companies.

As an **award-winning, innovative medium-sized group of companies**, the Witte Group offers a broad portfolio of **system solutions in the field of industrial and security printing**. **Innovation, quality, customer satisfaction and reliability** always take center stage and form the basis for the outstanding international position of the Witte Group in the market.

Absolute customer focus, systematic innovation management and entrepreneurial passion characterize the corporate culture of the Witte Group. Whether printed electronics, new types of technical labels, highly specialized security printing products or high-quality label and packaging solutions — the group of companies consistently focuses on innovation, quality, customer satisfaction and market success based on true partnerships. This is also reflected in the group's broad product portfolio. The Witte Group offers solutions in the following areas:

- **Printed Electronics:** System solutions and development services for the functional printing of, for example, humidity, temperature and pressure sensors, heating, NFC antennas or SmartLabels.

For the Witte Group, inclusion in the ranks of the TOP 100 innovators is both recognition and motivation. **CEO and managing director, Dr. Matthias Seiler** emphasizes: *"The Top Innovator award confirms the path we have taken and motivates us to continue to focus consistently on innovation, strategic innovation management and top product quality. We will continue to do everything in our power to inspire and satisfy our customers in order to consolidate our position as a market leader in industrial and security printing based on first-class system solutions."*

Udo Feldmann, Managing Director of Witte Technology GmbH, adds: *"For many years, innovation, motivation and a high level of expertise have distinguished us as a solution provider for the challenges of our customers. Many special solutions have been developed in-house, and this award reflects this spirit."*

The Witte Group further extends its innovative capabilities across international markets. For example, Maquiladora Gráfica Mexicana S.A. de C.V., part of the Witte Group, has made significant strides in the US and Mexico with its innovative multifunctional labels, high-quality packaging solutions, and printing expertise. **Juan José Castro, Managing Director** of Maquiladora Gráfica Mexicana S.A. de C.V. (MGM), highlights: *"MGM continues to be a benchmark for product quality and dependability in both the US and Mexico. We ensure that even in the most dynamic and challenging market conditions, our customers find success through innovative labels, high quality packaging solutions like folding boxes, and flexible printing solutions."*

About the contact persons of the Witte Group

Udo Feldmann: Mr. Feldmann is the managing director of Witte Technology GmbH in Münster, Germany. Witte Technology GmbH has four business units: Security printing, vehicle security, industrial printing, printed electronics, and customers all over the world.

About the Witte Group

The Witte Group is a leading industrial and security printing company. At several locations in Germany (Wermelskirchen and Münster) and Mexico (Guadalajara and Tijuana), are innovative system solutions, multifunctional, forgery-proof and transfer-proof, self-adhesive marking systems, official documents, vehicle security products and high-quality packaging produced. In addition, printed electronics is one of Witte's core competencies. With its material, printing and processing expertise and modern production capacities, the Witte Group manages the entire development of an organic printed electronics product and supports its customers from the product idea through prototype production to industrial series production. The focus is on particularly flexible, multifunctional printed products that offer applications in various industries, such as pharma, healthcare, medical technology, the automotive and supplier industry, the consumer goods and chemical industries and mechanical engineering.
